GOOD FOR YOUR STUDENTS

Students experiencing panic attacks, depression, anxiety, school avoidance or other emotional issues receive **early intervention**.

Sage brings the most support to students in the **least restrictive environment**, offering flexible non-school hours for family counseling.

In addition to individual and group counseling **1-3 times per week**, students can check in with their Sage Clinician and work through issues before they escalate to a conflict or crisis.

If a student is in crisis, Sage Clinicians can respond immediately for a **quicker recovery time** and return to learning. If further intervention is needed, Sage Clinicians are trained to assess the need for a higher level of care.

GOOD FOR YOUR SCHOOL

Reduce **out-of-district placements** by utilizing Sage Certified Clinicians™ to identify students who can remain in-district with additional therapeutic support.

School districts **save an average of \$250,000** per school year per clinician with Sage Thrive.

With **more than 20 years** of specialized experience running therapeutic day schools, we can provide expertise to your school in handling the most complex situations.
